Data Analysis: Microsoft Excel (Macros, VLOOKUP, VBA, Pivot tables), SQL, Python (NumPy, pandas, SciPy, stats models), R programming.

Data Visualization: Power BI, Tableau, Microsoft PowerPoint, Looker Studio.

Tools & software: Bloomberg Terminal, S&P Capital IQ, QuickBooks, SAP, JavaScript, Oracle Financials, Salesforce, MATLAB (for financial modeling)

Regulatory Compliance: GAAP, IFRS

EXPERIENCE

Specialty Medical Center

Financial Analyst

Jan 2025-Present

Detroit, USA

- Design and maintain real-time financial dashboards in Looker Studio integrated with BigQuery to analyze revenue trends, cost centers, and profitability metrics, improving reporting efficiency by **27%**.
- Automate recurring financial and operational reporting across Google Sheets and Smartsheets using Apps Script and SQL queries, reducing manual workload by **43%** and increasing accuracy.
- Conduct variance analysis and trend forecasting by integrating historical financials with operational data, supporting strategic decisions.
- Develop applications for secure OAuth authentication and structured data extraction from EHR systems, accelerating financial reporting workflows by **80%**.
- Monitor liquidity, cash positions, and counterparty exposure, identifying patterns and anomalies that influence financial strategy and treasury decision-making.
- Construct LBO models, including one for a \$0.6M acquisition (completed), analyzing capital structure, synergies of \$0.4M, and projected returns.

Community dreams foundation

Financial Analyst

Oct 2024 – Jan 2025

Remote

- Built **Power BI** dashboards to monitor sustainability KPIs, leading to a 15% improvement in strategic insights.
- Created detailed budgeting models in **Excel** (Macros, VBA), boosting forecast accuracy by 20%.
- Delivered financial updates using **PowerPoint** and real-time data from S&P Capital IQ, improving decision-making.
- Organized compliance frameworks with QuickBooks and Oracle Financials, ensuring adherence to GAAP and IFRS with zero audit issues.
- Supported CRM data integration using **Salesforce**, optimizing client relationship and improving data access.
- Coordinated audits with **Oracle** Financials, reducing audit prep time by 40% and supervised daily operations using **SAP**.

R3 Exports & Imports

Financial Analyst

Jul 2021 – Jul 2023

Hyderabad, India

- Utilized **SQL** to integrate customer data with market data, uncovering key trends in customer behavior by analyzing critical indicators such as CCI, CPI, and retail sales data, supporting strategic decision-making.
- Enhanced risk mitigation strategies using **derivative models** to manage financial risks from currency fluctuations and trade policies, leading to a 20% reduction in risk exposure
- Leveraged **Advanced Excel tools** (Pivot Tables, VBA) to track and analyze expense reports, implementing strategic cost-saving initiatives that achieved a 15% reduction in operational expenses.
- Played a pivotal role in investment decisions, employing **DCF** and **NPV models** in Excel to revise cost-benefit analyses for market expansion and technology acquisitions, driving a 12% increase in investment returns.
- Launched data visualizations and financial dashboards in **Power BI**, facilitating data-driven decision-making across import/export projects.
- Managed financial projections, payables and budgeting in **Oracle Financials**, optimizing cash flow for import/export transactions with Africa, leading to a more sustainable revenue model.

R3 Exports & Imports

Junior Financial Analyst

Jul 2019 – Jun 2021

Hyderabad, India

- Assisted in multiple projects by developing **Excel Macros** to automate reporting, improving the accuracy of financial reports by 15%.

- Innovated financial transactions and reconciliations in **QuickBooks & SAP**, resulting in a 25% reduction in month-end close time and created weekly revenue reports and insights, developing tools for Key Performance Indicators (KPIs) that drove a 7% increase in incremental revenue.
- Evaluated economic and market conditions in the Indian and South African markets, using **S&P Capital IQ** for up-to-date financial data, contributing to a 12% increase in market expansion opportunities.
- Conducted market research on potential products using **Python** (pandas, NumPy) for data analysis, resulting in a 10% increase in revenue and a 20% growth in derivative investments.
- Utilized **Bloomberg Terminal** to stay updated on global commodity prices, aiding in timely import/export decisions and ensuring price competitiveness in both the markets.

St. Anns College

Jan 2020 – Dec 2020

Market Research Analyst

Hyderabad, India

- Conducted a comparative study on 10 major companies with and without ESG initiatives, resulting in a publication on Green Economics and Sustainable Finance, emphasizing ESG impact on company growth.
- Simplified data, using **R** programming, to quantify the operational benefits of ESG initiatives, revealing that companies with robust ESG practices achieved a 17% higher average return on equity (ROE).
- Used **GAAP and IFRS** standards to rigorously evaluate companies' ESG scores, assessing factors such as carbon footprint and renewable energy adoption, to provide an accurate measure of sustainability.
- Employed **Microsoft PowerPoint** to develop professional presentations for a board of doctorates, summarizing findings.

ACADEMIC PROJECTS

Equity Valuation Application:

Jul 2025

- Developed a multi-model valuation tool integrating Yahoo Finance APIs for live data and built-in DCF, relative valuation, and asset-based models.
- Automated Excel outputs for decision reports and visualized comparisons across 50+ equities, improving speed and accuracy of personal portfolio evaluations.

Mergers & Acquisition:

Mar 2024

- Proposed acquisition of LANC by General Mills (GIS) based on expected market trends, SWOT analysis and Market multiples.
- Used NOPAT valuation, estimated a potential EBITDA increase of 13.5% and \$333 million in revenue growth due to integration.

Equity Factor Fund – Python, Quantitative Strategies

Mar 2024

- Developed a long-only factor fund using **Python**, targeting value, quality, and momentum factors, achieving a 12.5% return over three years, outperforming the market by 3.2%.

Portfolio Management – S&P 500, Risk Management

Mar 2024

- Managed a hypothetical \$10M equity portfolio, achieving a 20.66% annualized return with superior risk-adjusted metrics, outperforming the S&P 500 benchmark.

CFA Research Challenge – Equity Research

Feb 2024

- Collaborated with a team of finance experts, representing the University of Cincinnati, showcasing strong analytical and valuation skills.
- Analyzed in-depth financial analysis and valuation of a publicly traded company, leading to the creation of a detailed 50-page research report and a 30-minute presentation that was presented to industry professionals.
- Applied sophisticated financial modeling techniques, including discounted cash flow (DCF) analysis and comparable company analysis, to accurately forecast the company's future performance over a 5-year horizon.
- Issued a sell recommendation on the stock, predicting a 28% downside, presented findings to a CFA professional, receiving valuable feedback and validation of the analysis.
